

**Gideon Squared Solutions Limited**

Suite 37  
15 Tempo House  
London  
SW11 2PJ

# Capability Statement

### History:

After working in the field for 3 years Simon Perryman was very disappointed by the level of IT support given to small businesses and felt that often the client got a very unfair deal. As a direct result Gideon Squared Solutions was established in January 2005.

The company was incorporated in August 2005 to allow us to access a greater client base and also to reflect the increasing professional standards. We continued to work with a wide range of clients throughout 2005 and 2006.

In January 07 it became clear that the business required expansion and relocation. We are still entirely committed to delivering the absolute best to small business clients and now feel that we are even better positioned to deliver the level of support that your business needs.

So contact us today to find out how we can help your business make the most of your IT spend.

### What We Do:

Gideon Squared Solutions set out to bring affordable quality to the small business IT market. We offer a full range of services from ad-hoc support right through to custom tailored packages with set amounts of time each month.

We are also proud to offer a one third discount to not for profit organisations.

Our staff specialise in the following technologies:

- ❖ Speaking your language and helping you no matter how complicated your needs are
- ❖ Remote support where possible to allow the quickest possible resolution times
- ❖ Networking and VPN's including ADSL, SDSL and Leased Lines
- ❖ Network Cabling and Cable Installation
- ❖ Wireless Networks including VPN and Radius level authentication
- ❖ Windows Servers including Active Directory and Exchange (NT4, 2000, 2003)
- ❖ Desktop Support for all Microsoft Windows versions
- ❖ Printers and Scanners including print servers and network scanning
- ❖ Web applications and design in partnership with [www.threefour.co.uk](http://www.threefour.co.uk)
- ❖ Web hosting and server co-location in partnership with [www.igx0.net](http://www.igx0.net)
- ❖ Linux and Unix servers
- ❖ Firewalls including Smoothwall, Sonicwall and Microsoft ISA
- ❖ Anti-Virus, anti-spam and anti-spyware technologies from Symantec, Lavasoft and Trend Micro.
- ❖ Mobile email using both Blackberry and Windows mobile push email
